SUMMARY

Full-stack web developer who builds fast, responsive, production-ready applications with React, Next.js, and Node.js. Comfortable across the stack, from designing accessible UIs to building REST/GraphQL APIs, and shipping to the cloud with CI/CD.

EXPERIENCE

Google Verily

Aug. 2018 – Sept. 2019

Software Engineer (Front-End)

San Francisco, CA

- Led front-end development of a React dashboard to process 50k blood samples, cutting page load time by 45% through code-splitting and lazy loading
- Rebuilt a Quality Control web app with input from 20 cross-functional stakeholders, introducing a reusable component library that saved \$1M annually
- Shipped a new lab workflow tool with a responsive, accessible UI (WCAG AA), driving a 40% increase in efficiency across 10 core users

Amazon

May 2017 – Aug. 2017

Software Engineering Intern

Seattle, WA

- Joined the Search Customer Experience Team; received a return offer for a full-time role
- Shipped a new front-end feature to 2M+ users that improved the search experience for movie series-related queries
- Built a back-end REST service in Java and a React UI to support future feature iteration

YouTube

Aug. 2019 – Present

Creator & Web Developer (@harshibar)

San Francisco, CA

- Grew a tech channel to 60k subscribers in 1.5 years; built a personal website and blog with Next.js and Tailwind CSS
- Ran A/B tests on titles and thumbnails, increasing impressions by 2.5M in 3 months

PROJECTS

SaaS Starter Platform | *Next.js, TypeScript, Tailwind CSS, Prisma, Stripe, PostgreSQL*

- Built a full-stack SaaS boilerplate with authentication (NextAuth), Stripe subscription billing, and a role-based admin dashboard
- Used server components and edge caching to hit a 95+ Lighthouse performance score; deployed on Vercel with CI/CD

Real-Time Collaboration App | *React, Node.js, Express, Socket.IO, MongoDB, Redis*

- Developed a live document/whiteboard tool supporting concurrent editing with WebSockets and conflict resolution
- Scaled real-time sync with Redis pub/sub and containerized the stack with Docker for reproducible deployments

AI-Powered E-Commerce Store | *Next.js, TypeScript, tRPC, OpenAI API, Stripe, Tailwind*

- Created a headless storefront with an AI product-recommendation assistant and semantic search over the catalog
- Integrated Stripe checkout, optimistic UI updates with React Query, and a fully type-safe API layer via tRPC

EDUCATION

Wellesley College

Aug. 2014 – May 2018

Bachelor of Arts in Computer Science

Wellesley, MA

- Coursework: Data Structures, Algorithms, Databases, Computer Systems, Web Development
- Research: MIT Graybiel Lab (published author); MIT Media Lab (analyzed urban microbe spread)

SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL, Python

Front-End: React, Next.js, Redux, Tailwind CSS, Sass, Vite

Back-End: Node.js, Express, tRPC, GraphQL, REST, Prisma

Databases: PostgreSQL, MongoDB, MySQL, Redis

Tools / DevOps: Git, Docker, AWS, Vercel, CI/CD, Jest, Figma
